Re: Action required to comply with California & Colorado disclosure laws

newellbrands.com

Dear Valued Customer,

Newell Brands is committed to consumer safety and adhering to the changing regulatory landscape of clearly communicating chemicals within products.

Overview

State laws in California and Colorado require the disclosure of certain chemicals. Specifically, California Assembly Bill 1200 and Colorado House Bill 22-1345 require that products include the same chemical disclosure required on the product label and online sales listing.

To comply with requirements for California, the Coleman® products impacted by these Bills manufactured after 12/31/2023 will include an updated chemical disclosure on the product labeling. Newell Brands' interpretation is that products manufactured before this date can sell through with their existing labels.

Customer Action Required

We ask that you please update the online listings for products documented within this communication. To assist, we have organized the updates by SKU and product names. Please add the information in Exhibit 1 to the online product listings before January 1, 2024.

To the extent that Newell Brands is obligated to update its product information for the product listings on your website, we will add the Exhibit 1 updates for the applicable SKUs before January 1, 2024.

We thank you for your support of our brands and look forward to continuing our partnership.

Sincerely,

A handwritten signature in black ink that reads "Brad Creel".

Brad Creel
VP of Sales. Outdoor & Recreation Division
